PROFILE

Self-motivated Software Engineering student with real-world experience developing web applications using Django, Bootstrap, JavaScript, and React. Strong in backend development and building full-stack solutions with clean UI, responsive design, and RESTful APIs. Currently building scalable web platforms and passionate about delivering value through functional, secure, and modern code.

EDUCATION

Bachelor of Science in Software Engineering

Jan 2022 - Dec 2026

ZCAS University, Lusaka, Zambia

- Relevant Coursework: Web Development, Software Design, Software Engineering, Databases, Computer Networks, Cyber Security
-

PROJECTS

Team Task Manager App - Django, JavaScript, Bootstrap

- Built a web app for managing team tasks with a Kanban board
- Features include user authentication, task commenting, file uploads, and AJAX modals
- GitHub: <https://github.com/chrismushaz/TASK-MANAGEMENT-APP.git>

Personal Portfolio Website - HTML, CSS, Bootstrap, Django

- responsive portfolio to showcase skills, projects, and contact info
- Integrated Django templates, static files, and a contact form
- GitHub: <https://github.com/chrismushaz/portfolio.git>

Errands App (Client & Tasker Platform) - Django, JavaScript, Bootstrap

- Built a platform to connect clients with taskers for services like laundry, garbage collection, and car wash
 - Implemented role-based system (Client/Tasker) with secure login and dynamic dashboards
 - Features: task posting, task acceptance, profile management, mobile-responsive UI
 - GitHub: https://github.com/chrismushaz/Errands_Web_App.git
-

TECHNICAL SKILLS
